## Recruiting For 15th Light Horse

There has been a good response to recruiting for home defence with the 15th Light Horse, a detachment of which is being formed at Didsbury.

An organizing meeting was held on Friday when it was decided to hold parades at the school grounds on Monday and Thursday evenings of each week.

The Non Permanent Active Militia has had about the same function in war as it has in peace.

Its object is to give men military training in their spare time, two or three evenings a week, so that they will be prepared for active service if and when the need arises. The man who joins the militia keeps working at his job, keeps living at home. The only difference it makes to him is that he is going down to parade to be instructed on regular evenings.

The man who joins the militia is under no obligation to serve overseas. He joins only for home defence.

Twenty-three have been already enrolled but it is expected that number will be greatly increased during the next week. 2nd Lieut. N A McLeod is in charge of the detachment.

Men wishing to enlist in this non permanent force should get in touch with C E Reiber.

## Gov't. to Decide on Farm Stores

Decision concerning farm storage of the 1940 wheat crop will be reached at Ottawa by the end of the month and a partial announcement with respect to policies to be adopted in the handling of the crop will be made very shortly, Hon. J. A. MacKinnon, minister of trade and commerce has informed officers of the Alberta Federation of Agriculture at Calgary.

Representatives of agricultural producers on the wheat problem are receiving our "most earnest and serious attention," Mr. MacKinnon advised Mr. E. W. Brundsen, secretary of Alberta Federation, Saturday, following the forwarding of a resolution adopted at the annual meeting of that body in Red Deer, July 15th.

The minister's communication indicated the government is endeavoring to work out "some form of paying the grain growers to retain at least a good portion of their grain on their own farms."

## WEDDINGS

### KLINCK—FARR

Airdrie United Church was the scene of a pretty wedding on July 3rd at 4 p.m., when Evelyn Van Sickie, third daughter of Mr. and Mrs. T. E. Farr, and Ervin Daniel Klinck, of Didsbury, son of Mrs. Mary Klinck, were united in marriage. Rev. J. B. Ball performed the ceremony before a background of peonies and cedar, which were used to form a garden wall.

The bride, given in marriage by her father, was attended by her sisters, the Misses Jean and Viola Farr.

She was gowned in a formal frock of ivory satin finished in princess lines, with full-length gores of lace. The bodice had a Peter Pan collar, tiny satin buttons extending down the front to the hem-line, and tightly fitting long sleeves of shirred satin. A coronet of orange-blossoms held her soft net veil in place and she carried a white Bible with forget-me-nots and pink rosebuds in the streamers.

The two bridesmaids wore similarly fashioned "Gone With the Wind" frocks of broaded net. Miss Jean Farr was in pink, with a corsage of yellow rosebuds, while Miss Viola Farr was in blue, with a corsage of pink rosebuds. Both wore pink and blue flowers in their hair.

Mr. Clayton Manning, of Calgary, was the groomsman, and Messrs. Clifford Fletcher and Lambert Farr were the ushers.

Mrs. Clifford Fletcher, sister of the bride, played the wedding music, while Mr. Alec Robertson, of Didsbury, sang "O Promise Me," during the signing of the register.

Following the ceremony a reception was held at the home of the bride's parents. Pink and white peonies and pinks were used in the decorations. A three-tiered wedding cake, topped by a miniature heart and bell, centred the bride's table.

The bride's mother chose for the occasion a blue crepe jacket-dress with white accessories and corsage of pink rosebuds.

For the trip to the Pacific coast, the bride chose a black pin-stripe suit with yellow blouse and a black and white off-the-face hat.

On their return Mr. and Mrs. Klinck will live on a farm four miles west of Didsbury.

## Good Weather Favors Didsbury Fair

Fine weather favored the Didsbury fair on Wednesday though the clouds indicated that showers were falling nearby.

The number of entries in the stock classes were not quite up to previous years, but the quality of exhibits was very high.

In the calf club exhibition there were fifty head entered and the high quality of stock shows that an advance is being made by the Calf Club. John Bruce was the winner in the calf class, while Harvey Stevens took 1st prize in both the yearling and two year old classes.

The exhibits in the building were somewhat disappointing, the entries having fallen down considerably. It almost appears that the ladies are falling down in keeping their end up in the fair.

A good program of races was put on and there were some interesting finishes.

Following were the results:

### 14.2 & Under

1st heat: 1 Noad's "Peter Pan"; 2 Evelyn Spencer's "Star"; 3rd, Doug Johnston's "Brownie".  
2nd heat: 1 "Star"; 2 "Brownie"; 3 "Peter Pan".

### Open Run:

1st heat: 1 Johnston's "Silver"; 2 Noad's "Peter Pan"; 3 Johnston's "Fleet".  
2nd heat: 1 "Peter Pan"; 2 "Silver"; 3 "Fleet".

### Welsh Pony Race:

1st heat: Norma Ady's "Dixie"; 2 Dorin Fulkeith's "Rex"; 3 Westfall's "Nichi".  
2nd heat: 1 Nichi, 2 Rex, 3 Dixie.

### Shetland Pony Race:

1st heat: 1 Shirley Cullen's "Rusty"; 2 Clarence Ady's "Cupie"; 3 Billy Fulkeith's "Trixie"; 4 Billy Collinge's "May".  
2nd heat: 1 Rusty, 2 Trixie, 3 Cupie.

In the tug of war, Francis' team had an easy win over Leeson's lighter aggregation.

### SOFTBALL TOURNAMENT

The draw in the softball tournament resulted as follows:

Grand Centre vs High School  
Melvin "Clovermount"  
Bowden "Counter Hoppers"  
Didsbury E Community, bye.

Grand Centre Eagles had it all over High School and wound up with a 25-5 victory, despite good pitching and catching by Percy Heine and John Holub. Grand Centre battery, Steele and Scheuerman.

In the Melvin and Clovermount game, the former team had failed to put in an appearance when play was called, so Didsbury E Community played off with Clovermount Bronks. At the end of the 7th the score stood at 8-7 for the eastern aggregation and in the 9th they cinched the game 9-8. Batteries, East Community, Bill St Clair and Ellis Barnes; Clovermount, H. Thom and R. Shantz.

Bowden and Counter Hoppers met in a well matched encounter that saw some hard hitting by both sides. The game was tied 5-5 at the end of the 7th and was still deadlocked in the 9th. Going into the 10th, Bowden managed to bring in the two runs to win a hard fought game. Batteries: Bowden, House and Steeves; Didsbury, Berscht and Tuggle.

Grand Centre beat Community by a runaway score of 24-7 and Bowden beat Melvin 12-3, bringing them into the final against Grand Centre.

Dr. Gordon Liesemer, Mrs. Liesemer and son Grant, of Detroit, Michigan; Mr. W. G. and Miss Evelyn Liesemer of Calgary; Mr. and Mrs. Russell Berscht and little Kenney, of Innisfail, were guests at the home of Mr. and Mrs. J. V. Berscht on Wednesday.

## Presentation Made To Elevator Man.

Mr. Al McInnis, who recently retired from his position as manager of the Federal Elevator at Didsbury was presented with a gladstone bag by a number of friends and business men on Saturday last.

Mr. McInnis has had charge of Federal Elevator ever since it was built 16 years ago and during that time has put over three million bushels of grain through the elevator. He was always popular with both his fellow elevator men, farmers and business men who are all sorry to see him leave the town.

He is succeeded in the elevator by Mr. H. M. Bowman of Calgary, who has had long experience in the grain trade, having been connected with the Federal Grain Co. for the past seventeen years.

## Farm Women's Week at Olds, July 29, Aug. 2

The 11th Annual Farm Women's Week at the Olds School of Agriculture will commence tomorrow, July 29th, and continue until the 2nd of August.

Of interest to rural women, the program arranged is of a none too strenuous character and ample opportunity is provided to enjoy the beautiful grounds and attractive surroundings.

Comfortable modern dormitories are open, where board and room is available at very moderate cost. Facilities are provided for the care of young children.

Farm Women's Week is open to the women of Alberta. There is no obligation for participants to complete the full 4 day program; if they so desire, guests can arrange for shorter periods.

## Obituary.

### MRS. MARY DUNCAN

Mrs. Mary Duncan, aged 77 years, one of the pioneers of the Didsbury district, passed away at her home in Twining, Alberta, on July 13th.

Born Mary Bygore, at Perth, Ont., on January 27th, 1863, she was married to Joseph M. Duncan in 1887. They came with their family to Alberta in 1902 and homesteaded in the Neapolis district, where Mr. Duncan died in 1903. In 1921 Mrs. Duncan and her daughters moved to Didsbury, where they resided seven years, then moved onto a farm at Allingham and later, in 1937, to Twining, where she lived until her death.

She leaves to mourn her passing, one son, Samuel, of Ponoka and two daughters, Myra Duncan and Mrs. Wm. Mackenzie, both of Twining; a daughter and son, Sadie and Hector, preceded their mother in death; besides other relatives and friends, among whom she will be greatly missed.

Mrs. Duncan was converted in her youth and died in the faith after an illness of only half an hour. The funeral was conducted by Rev. C. J. Hallman in Didsbury M.B.C. Church and interment was made in the local cemetery.

### MRS. WARREN PETERSON

Word has been received of the death of Mrs. Warren Peterson, aged 55 years, who passed away at her home at Central Valley, Calif., on Wednesday of last week.

Mrs. Peterson (nee Barbara Stuart) was a daughter of the late Dr. M. Stuart, a pioneer of the Neapolis district. Leaving this neighborhood in 1909, she resided at Irma until 1923 when they moved to California.

She is survived by her husband, one son Charles of Eumaneclaw, Wash., and five grandchildren. Also two sisters, Mrs. Henry Hooper of Didsbury, Mrs. A. R. Johnson of Proctor, B.C., and one brother, Clarence Stuart of Cranbrook, B.C.

## Crystal Dairy Wins Butter Awards

The Crystal Dairy Creamery at Didsbury were successful in getting into the prize awards at the Agricultural Exhibitions in the Western Provinces this summer.

They took a second prize at Brandon and second and third prizes at Calgary and Edmonton.

## 18,500 Autos in Alberta Parks

No less than 18,500 cars, carrying approximately 75,000 persons, were registered at the Banff, Jasper and Waterton parks in the period ended June 30th, according to official government figures, carried by "Voice of Motordom," official organ of the Alberta Motor Association.

These figures do not include the thousands of cars that entered these parks during Dominion Day holiday period that opened July 1st.

In April 728 Canadian cars with 1,751 passengers entered Banff park. In May Banff registrations showed 3,976 Canadian cars with 11,893 passengers; 83 American cars with 225 passengers, and two foreign cars with four passengers. June registrations at Banff showed the Canadian car total climb to 7,597 with 28,164 passengers; 784 American cars with 2,343 passengers, and four foreign cars with ten passengers.

For the three months ended June 30th, Waterton Lakes park led the province in percentage, having an increase of approximately 100 per cent over 1939 figures.

During this period 3,115 Canadian cars entered Waterton park, carrying 12,008 passengers, while 1,454 U.S. cars had 4,596 visitors aboard. In addition, ten foreign cars brought a further 27 persons to the park.

Completion of the Jasper-Banff skyway indicated that there would be a big volume of traffic, as 1,392 cars travelled over the new road from the south in the period after it was opened to the public on June 15th, up to June 30th.

## Winning New Markets

The action of the federal government in appointing a national oil controller is a natural sequence to the decision of Parliament to vest in the government authority to conscript the man power, resources and productive power of the country with the prosecution of the war with maximum speed and efficiency in this country as its single objective.

When the importance of oil which, in this instance, means petroleum and all its derivatives, including gasoline and fuel oils, as an agency of warfare in this generation is taken into consideration, the early decision to exercise control over production, manufacturing and marketing of all petroleum, was to be expected, almost as soon as the government was clothed with the necessary powers by the people's representatives.

While at the time of writing comparatively few details of the steps that will be taken to convert this valuable Canadian resource into an important auxiliary in the country's war effort, and the extent to which it will be used for this purpose, has not been announced, it can be taken for granted that the war needs will be given paramount consideration, as indeed it should, but that at the same time, the country's ordinary industrial requirements for petroleum will be safeguarded, insofar as they do not hamper requisitions for war use. The government and the controller will undoubtedly recognize that agriculture of the present day is largely dependent upon gasoline and fuel oils for its efficient operation and that efficient operation of agricultural pursuits is one of the most important roles which Canada is expected to play in the fight against Hitlerism.

### A Widening Scope

Combined with the imposition of a new levy on imports, governmental control and regulation of the oil industry of the Dominion, in addition to speeding up and strengthening the nation's war effort, should prove an economic advantage to the west and particularly Alberta, the site of the Turner Valley oil field, proven in the past two or three years as one of the greatest oil reservoirs in the British Empire.

One of the benefits to be expected from this combined move is a substantial extension of the domestic market for Alberta petroleum. Until now the Alberta product has been restricted to a comparatively narrow market and it has been economically unfeasible to ship it as far west as Vancouver or as far east as Winnipeg. It has thus been virtually restricted, as a commercial possibility, to a portion of the prairie provinces, where the demand is largely seasonal due to climatic exigencies. Not only that, but even in that restricted market it has been subject to competition with oil from fields in the Western States.

As a result of these two factors it has been necessary during the past two years to ration production in the Turner Valley field, otherwise there would have been overproduction.

Apart altogether from any control measures which the government may impose through the national oil controller, the market for Turner Valley petroleum has been widened automatically as a result of the new war exchange impost of ten per cent on imports and this measure alone is expected to bring the Winnipeg market into the Turner Valley orbit. It is understood and anticipated that regulations are likely to be devised and made effective which will still further widen the market for the Alberta product, though which of several possible measures with this end in view will be adopted is not yet determined. It is expected, however, that the Pacific Coast market will be brought within the Alberta sphere and that sooner or later Turner Valley oil will be made available to at least a portion of the Eastern Canadian market.

### A Dual Objective

One effect of these actual and potential measures will undoubtedly be a marked stimulus to further development of the sources of supply, not only in the Turner Valley oil fields, but in other Alberta fields and may be expected to result in an acceleration of exploration and testing work in Saskatchewan as well as Alberta.

Another and new prospective outlet for Western Canadian petroleum is the manufacture of gasoline of high octane rating for use in the large quantities of aeroplanes which will shortly be in service in the west under the air training plan. While this, it is understood, will necessitate some changes in equipment at the Western Canadian refineries, it is reasonable to expect that the necessary alterations will be made and that this is contemplated as part of the new control plan.

With markets for some of Western Canada's agricultural products materially narrowed as a result of the misfortunes of the earlier stages of the war in Europe, it is very vital that other sources of revenue be expanded to enable the west to make a maximum contribution to the war effort and to furnish an additional insurance policy in post-war days, when they come. Petroleum may be destined to be one of these sources.

### A Famous Warhorse

Queen's Own Adopted "Old Balachayna" After Rider Was Killed

In a recent interview in Toronto, Sir William Mulock of that city, who joined the Queen's Own in 1861, related the story of "Old Balachayna," the chestnut warhorse whose rider was killed. And he never paused just went right on at the duty for which his master gave his life. And they never dispossessed the faithful beast. He was in it, rideless, as long as he lived. The Queen's Own adopted Balachayna and treasured him till his death. And the empty saddle was kept empty till he died.

### Money Pouring In

Britain's Chancellor Of The Exchequer Speaks Of Contributions From The Empire

Sir Kingsley Wood, chancellor of the exchequer, told Britons that "no limit can be put to our war effort; we must throw everything in." In a luncheon address the chancellor said more than £4,000,000 (about \$17,600,000) had been offered in response to the government's recent appeal for interest-free loans, and that one man signing himself "Confidence" had sent a gift of £200,000 "without any condition."

Gifts to help finance Britain's war effort have come from every part of the Empire. School children and old age pensioners are among the donors.

Sir Kingsley said one of the vital reasons for confidence in the future was the fact that the "daughter nations are throwing everything in and are sending in increasing measure men, materials and munitions."

### Technique Of Parachutists

#### Matter Of First Importance To Study Their Methods

An announcement by the office of the director of public information says "it has become a matter of the first importance to study the methods adopted by German parachute troops, and to consider how they are dropped, how they are equipped and clothed, and what their objectives are."

The parachute troops are dropped to organize local "Fifth Columnists" and to arm them, to create panic and confusion and spread false news among civilians, to harass communication lines, to damage bridges, power stations, wireless and telephone exchanges, stores and dumps, and to give information to aircraft by means of signals.

The parachutists are said to be able to jump safely from a height as little as 150 feet from planes travelling about 75 miles an hour. The planes often are about 1,600 feet apart, the aim apparently being to land a company within a space 650 by 1,300 feet and to get it assembled within 15 minutes.

The uniform consists of a close-fitting steel helmet resembling somewhat a motorcyclist's crash helmet, a double-breasted tunic, and trousers of the plus-four type. The helmet is narrower than the normal German steel helmet and has neither neck shield nor peak. The blue-grey tunic is cut loose with the collar turned down and open at the neck, with no buttons showing. The trousers are tucked in over boots half-knee high and laced at the side. Each man wears gauntlet gloves.

The light equipment carried by each man includes hand grenades and a gun capable of firing 600 rounds a minute. Other weapons and equipment dropped in special containers attached to self-opening parachutes are filled with ammunition, rifles, field glasses, compasses, spades, smoke candles and wire.

Patrol of the entire country is given as the essential means of defence against parachutists.

### Music By Faith

#### Brilliant Young Canadian Composer To Be Guest Conductor On International Networks Feature

Long noted for his brilliant performances over the Canadian Networks of one of Canada's leading composers of modern music, Percy Faith has recently completed arrangements to conduct several programmes for the Carnation "Contented Hour" which commenced July 1st. Toronto born and educated, Faith attended Jarvis Collegiate and the Toronto Conservatory of Music, beginning his studies in the latter institute when he was 11 years old. Noted for his "streamline" treatments of the classics, his programme, Music by Faith, has been one of the highlighted broadcasts of the C.B.C. He has also conducted such famous programmes as the World's Concerts, Streamline Bands Across the Sea. Faith broke into radio in 1929 and later conducted the Fifth World Concert for which he wrote and arranged the music. The Royal Visit musical programme last year was under his supervision. His forte of taking stock scores and turning them into joyous, decorative, modern pictures in music has won him international recognition and today he is regarded as one of the most interesting and original of the younger generation musicians in Canada.

### Honored By King George

#### Titles Have Been Conferred On Five French Officers

Announcement was made that the King had conferred honors upon five French officers.

The title of Knight Commander of the Order of the Bath (K.C.B.) was conferred upon Admiral Jean Abrial, naval commander of the Dunkirk evacuation, and General Georges Blanchard, commander of the Allied armies in Flanders.

General Benoit and General de la Laurencie were named Knight Commanders of the British Empire (K.B.E.), and General Marie-Emile Bethouard a Companion of the Order of the Bath (C.B.).

General Bethouard commanded the forces in the Narvik area of Norway.

### Educational Problems

#### Fitting The Student To Succeed In The World Of Business And Industry

Eighty-five per cent. of high school students never go to college or university. Yet for the most part secondary education is geared to meet the needs of the 15 per cent. who are academically minded. So thoughtful educators are pondering the problem of providing a better secondary curriculum to provide the necessary education and training to enable boys and girls to make satisfactory adjustments in the world of business and industry after leaving their sheltered classrooms.

As the result of a partial survey it has been found that the high school girls and boys who had specific job training as part of their regular academic career were able to adjust themselves more readily to the outside world. Students who received an opportunity to assume self-direction and self-responsibility in school jobs found adjustment much easier afterward.

### Movement Speeded Up

#### Every Eligible Man Is Needed For Air Training Program

"We want every man we can get," Flying Officer W. S. Lighthall of Ottawa, recruiting liaison officer for Canada with the Royal Canadian Air Force, declared at Calgary.

Outlining the tremendous training program ahead for Canadian airmen, he said 30,000 men to take to the air will be turned out each year by the assistance of another 40,000 in the ground schools. Flying Officer Lighthall said men are being called up fairly quickly now and the movement will be much faster from now on.

### Slaughter Of Innocents

#### Enemy Must Be Subjugated Before Any Talk Of Peace

It is difficult to believe at the present time, that there can be any reconciliation with the German people. The slaughter of innocents which they have carried through Poland, Holland, Belgium and parts of France, like their bombing of unarmed fishing boats, marks them as less than human. They have the forms of men but they are possessed of devils with which there can be no compromise and no thought of peace except the peace of subjugation.

More than ever the truth of Churchill's words can be no survival without victory. And for the sake of future generations, that victory must not be frittered away in the peace. Toronto Telegram.

## Science Must Be Brought To Bear In Maintaining Our Agricultural Industry

The role of technical agriculture during the war, said Dr. J. M. Swaine, Director, Science Service, Dominion Department of Agriculture, in a recent address at McMaster University in Hamilton, Ont., is clearly to assist in maintaining a sound agricultural industry in Canada, competent to supply the agricultural products required to a greater degree than ever before, able to furnish the United Kingdom and the allies of Canada with whatever they may need, and to maintain a stability that will make post-war adjustments possible without serious trade disturbances.

With an industry dependent so largely on overseas trade, and with those markets greatly reduced and future demands extremely uncertain, technical agriculture has before it a great field of work. Canada's largest market, the home market, should be more fully exploited; much attention has been given to selling apples and poultry in Great Britain, probably too little to selling them in Ontario and the prairie provinces. Soil fertility must be improved and maintained; the best cultural practices employed; the best seed produced and used; improved varieties developed and utilized; farm economics studied and applied; plant and animal pests and diseases controlled; new uses for agricultural products found and exploited; storage and processing facilities used much more extensively; and production and marketing policies and educational programs carried through as effectively as possible. Canadian produce should be of the finest quality, with the greatest economic production per acre in order to obtain the lowest possible cost to the producer and to the consumer.

In all this work, scientific-technical agriculture must give leadership and guidance, for on its help the agricultural community will be dependent as never before in the history of Canada. Careful planning by agricultural leaders and by individual farmers will be absolutely necessary in order for agriculture to play its part successfully in the years ahead.

### Still Making Church Bells

#### Founders In England Are Busy Even In War Time

Great church bells cast in the ancient foundries of England and rung in olden times to warn her people of the invader's approach must now be silent for the electric siren is the only sound allowed in modern war. Yet the bell founders are still busy making carillons to ring out in distant parts of the world.

New silver sixpences were thrown into the mould when three bells, the largest nearly a ton, were cast recently and have just been shipped to a church in Phaneromeni, Cyprus, less than two hours' air journey from Christendom's most famous chiming of all, the Bells of Bethlehem.

Throwing in "lucky" silver is only a superstition, for bells are made from two metals only, 13 parts of copper and four of tin.

British bells are in great demand overseas in spite of tariffs because the secret of scientific tuning is in the hands of a few specialist families, passed on through generations. There are only three founders who make the biggest types of bells. Canada and the U.S.A. are the best customers. The Dominion removes import duty from bells for church use, and campanologists in the States have so great a preference for English chimes that an expert ringer was sent to Kent, Connecticut, in 1930, with ten 25-cwt. tenor bells to teach the peculiar English change-ring.

Bells from a London foundry which was the birthplace of Parliament's "Big Ben" are now hanging in Christchurch Cathedral, B.C.; Valleyfield Cathedral, Quebec; St. John's, Newfoundland; St. Lucia, West Indies; Waikato, New Zealand; Durban, South Africa; Khartoum Cathedral; Achimota and Takoradi, Gold Coast; Oshawa, Ontario and Scheveningen, Holland.

If the shoe fits she thinks the salesman has made a mistake.

### Rich In Food Value

#### Canadians Should Recognize Advantage Of Using Apple Juice

Canadians drank 16 per cent. more manufactured soft drinks in 1938 than in 1937. Fresh apple juice differs from the carbonated beverage in that it is rich in food value and contains natural fruit acids, alkaline salts and vitamins. There are some who claim that in addition to being one of the most pleasant and palatable beverages, it has considerable medicinal value because it is unadulterated pure fruit. The possibilities of its use for fruit cocktails and for mixing with other beverages, in preference to imported citrus and other fruit juices, are substantial. The tourist trade provides a market of encouraging opportunities.

To get the best taste and bouquet it is usual to blend three or four varieties. In Eastern Canada well ripened McIntosh, blended with Stark, Spy, Ben Davis, Russet or other varieties make an excellent juice. In British Columbia blends of McIntosh, Jonathan, Newtown, Winesap, Wagener, Delicious and some others yield a splendid product. In Western Ontario a juice has been made from about 50 per cent. Russets and 25 per cent. Blenheimians and the juice from these when filtered looked like liquid sunlight and tasted like one would imagine the nectar of the gods tasted. Horticulturists at the Experimental Farm, Ottawa, who have been experimenting in the manufacture of apple juice for several years, say that to produce a juice that will be practically suitable to most persons, it may be necessary to adopt special label declarations such as "high acid," "medium acid" and "low acid".

If an apple a day will keep the doctor away a tin of fresh apple juice a day, which represents several apples, should prove a considerable added insurance to good health.

### The Earl Of Athlone

#### Is The 16th Governor-General Of Canada Since Confederation

The Earl of Athlone, who recently assumed office, is the 16th Governor-General of Canada since Confederation.

Others and the date they assumed office:

Viscount Monck, July 1, 1867.  
Lord Lisgar, Feb. 2, 1869.  
The Earl of Dufferin, June 25, 1872.  
Marquess of Lorne, Nov. 25, 1878.  
The Marquess of Lansdowne, Oct. 23, 1883.

Lord Stanley, June 11, 1888.  
The Earl of Aberdeen, Sept. 18, 1893.

The Earl of Minto, Nov. 12, 1898.  
Earl Grey, Dec. 10, 1904.  
The Duke of Connaught, Oct. 13, 1911.

The Duke of Devonshire, Nov. 11, 1916.

Baron Byng of Vimy, Aug. 11, 1921.

Viscount Willingdon, Oct. 2, 1926.

The Earl of Bessborough, April 4, 1931.

Lord Tweedsmuir, Nov. 2, 1935.

### Morale Of British People

#### Cannot Be Shaken Because They Pray As Well As Fight

Rev. Dr. Roelof H. Brooks, speaking in St. Thomas Protestant Episcopal Church, New York, recently, said that prayer is as much a part of national defence as armament in the present war. Dr. Brooks declared that one of the means of weakening an enemy is by ridiculing his religion and thereby shaking his morale. He pointed out that an army could not function at its best if the nation were confused. "England has been attacked in this manner," Dr. Brooks continued, "the same way as the smaller nations have been. But she defends herself not only with arms but also with God. War has never created a new phase of religion. It has merely brought to the surface what was in the hearts of man all the time."

A rustless, non-corrosive electric conduit has been perfected from wood pulp.

### Canada's Greatest Industry

#### Importance Of Pulp And Paper Is Not Usually Recognized

Whoever coined the phrase that to be great is to be misunderstood probably had the Canadian pulp and paper industry in mind. No one is left in doubt as to the importance of our farm lands, the central electric stations or mines, but when it comes to the pulp and paper industry there is an almost complete lack of understanding as to the positive contributions which this industry has made to the national welfare, both in times of peace and war.

The troubles and problems of the industry have been widely publicized. The public remembers them. What the public does not know is that over 30,000 people are steadily employed by the industry as wage earners in the mills and an additional 90,000 find seasonal employment in woods operation. More than 50 towns and cities are wholly or substantially dependent upon the industry. Canadian agriculture gains enormously through the purchasing power the pulp and paper industry provides directly and indirectly. So, too, does the mining industry in the purchase of equipment, while if it were not for pulp and paper Canada's water power industry would be appreciably smaller than it is to-day.

Probably the greatest contribution made by the industry these days to the national welfare is in trade. Through the medium of exports the industry added \$150 millions to the Dominion's favorable trade balance in 1939. It will be much more in 1940. Only one other commodity gold, made a better showing.

These are some of the positive contributions made by the industry. It is a magnificent story, but one only too infrequently told, for the industry has stuck to the old adage that it is only necessary to go on sawing wood. If the pulp and paper manufacturers are ever to secure recognition and appreciation of their contribution to the Canadian economy, then they will have to apply the same energy and foresight in informing the public as they did in building up Canada's greatest manufacturing industry.—Financial Post.

### Something Really New

#### California Man Is Making A Success Of His Wash-A-Teria

Glendale, California, has a business man who, with very little capital, has started a new enterprise. He has named it the "Wash-A-Teria". Housewives bring their washing to his establishment, use his equipment and supplies, and take home their washed clothes, all for a nominal charge. Each washing is done individually and offers a saving in soap, starch and bluing, water and heat.

### Early Training Pays

Training a foal to lead early in life means a lot less "breaking" both of horse and equipment, later. A horse that is properly handled from foalhood will usually settle down to work like a veteran, after being hitched a couple of times.

Texas gets its name from the Tejas Indians.

## Present Day War Methods Not So Modern If We Refer To Previous History

### Mental Tests Needed

#### Eliminate Nut Drivers And Save Thousands Of Lives

Lives of the 15,000 persons killed in traffic accidents in the United States each year might be saved if "nut" drivers were eliminated with mental tests, the American Medical Association was told.

Agreeing with popular opinion, Dr. Lowell S. Selling of Detroit, Mich., reported that mental examinations of traffic offenders in the Recorder's Court of New York city showed that many of them had just about enough sense to turn a steering wheel and step on the accelerator.

The tests made of persons haled into the court include a physical examination and tests of reaction time, judgment of speed and distance, and color blindness. In addition the offenders are submitted to mental tests, he said and required to give their entire history in order to obtain their intelligence rating.

"When intelligence is rated below normal a driver is obviously not competent to drive, no matter how well he may react mechanically," Dr. Selling declared because his judgment in an emergency is sure to be faulty. As a result many licenses of drivers are cancelled.

While engineering and enforcement are important approaches to the elimination of traffic accidents greater need, and perhaps greater hope, lies in the attack on the abnormal personality, he said.

### Regional Union

#### Might Have A Profound Effect On World Affairs

Possibility of a regional union in the Western hemisphere "which may have a profound influence upon the present conflict," was envisioned in a statement issued by the national executive committee of the League of Nations Society in Canada through its president, Senator Carnegie Wilson of Ottawa.

"To-day a universal League of Nations seems sadly remote said the statement issued after a meeting of the executive, "but in this Western hemisphere we see the possibility of a regional union which may have a profound influence on the present conflict."

"Let us not cease to explore every possible approach to better international action. The society must organize to play a dynamic part in winning the war."

Continued co-operating with the League of Nations Association of the United States, which recently organized the William Allen White committee to defend America by aiding the Allies, was resolved upon by the executive.

Many a man knows when to keep his mouth shut, but the trouble is he doesn't.

### Do Crewel Work In Gay Wools

PATTERN 6636

**Household Arts by Alice Brooks**

**Large Easy Stitches Make Scarf or Pillow Design Grow Rapidly**

Though this crewel embroidery is all in simple stitches, done in wool, it adds distinction to a room. Use the motifs on pillows, footstools, chair backs and scarfs. Pattern 6636 contains a transfer pattern of an 8 $\frac{1}{2}$  x 10 $\frac{1}{4}$  inch motif, two 11, four 2 $\frac{1}{2}$  x 4 $\frac{1}{4}$  inch motifs; materials needed; illustrations of stitches; color charts.

To obtain this pattern send 20 cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

In condemning modern methods of warfare one is apt to forget that the ancient invented incendiary. Back in Biblical times armies threw upon each other burning oils and flaming fire balls of resin and straw. Delilah in 424 B.C. saw the first flame projector a hollow tree trunk with a basin of burning materials at one end and bellows to blow the flame jet on the enemy. In the days of the Trojan king Aeneas burning pots of resin, sulphur, pitch, and tow were projected. Forerunners of to-day's incendiary bombs are seen in the inflammable bombs catapulted by the Romans and in the tube-like incendiary arrows.

All these preceded the famous Greek Fire (believed to have been invented by the Syrian Callimachus), which was used even in the wars of the Middle Ages. The troops of the Byzantine Empire used it against the Saracens and saved the empire by its means.

For centuries it was a secret weapon; finally, it was proved to consist of pitch, resin, sulphur, and petroleum as combustibles, with the reaction between quicklime and water to set it going; water for extinguishing it had to be used carefully as it has on the thermite of to-day.

Even the idea of landing troops by air is not a new one. In 1828 a certain Mr. Green astounded this country by suggesting that not only soldiers but even cavalry might be carried over the enemy lines by means of balloons. To substantiate his claim he declared that he himself had already made one such ascent on horseback from London.

For some reason best known to himself, however, he declined when challenged to prove his assertion by giving a further public demonstration, and for the next 22 years he suffered merciless ragging at the hands of all his friends and acquaintances. Finally he decided to silence his tormentors and announced he would make an ascent on horseback from Vauxhall Gardens.

The mount he chose was hardly worthy of the name horse, being a diminutive pony, but the large crowd that had gathered forgave the slight deception and gave him a great ovation when he actually did rise into the air mounted on the pony's back.

But even this feat was completely put in the shade two years later when a Frenchwoman, Mine Poitevin, actually floated over London mounted on a bull.

Measures to deal with possible invaders are meeting with no such opposition as Pitt had to encounter when he introduced his Additional Forces Bill in 1805 to meet a similar threat from across the channel. To placate some of the objectors he called together representative country squires to talk over his plans.

One of them protested against the defenders being called out "except in case of actual invasion." Pitt mildly suggested that that would be too late, but the objector was unconvinced. A little later he declared, regarding another clause in the bill, that he "never would consent to being sent out of England." "Except, I suppose," retorted Pitt, "in case of an actual invasion." — Manchester Guardian

### Perils Of The Road

#### Uninsured Cars Out Of Repair Constitute A Menace

The majority of uninsured drivers are those who have run the same car for many years or who have bought venerable used cars and try to run them as cheaply as possible. They can afford to buy old cars or can't afford to maintain them in safe running order. They are afraid to go to a garage for a checkup in case they are told they must spend so much on repairs or replacements. The result is they have accidents which may wreck perfectly good cars, perhaps kill somebody or maim some one for life, and they are unable to pay damages or compensation. Stratford Beacon-Herald.

**The World of Wheat.**

By H. G. L. STRANGE  
Director, "The Crop Testing Plan."

The "Crop Testing Plan" which is now busy with its tenth year of work, will test for trueness to variety and for content or absence of mixtures, some 20,000 individual farmers' fields of wheat.

At the first field day held this year in Manitoba one farmer submitted a sample which he declared was pure Thatcher, and he had purchased this seed and sown it on a large acreage so that he would not suffer any more losses from rust. The sample turned out to be pure Reward, which is not resistant to rust. If the farmer had not submitted this sample to the "Crop Testing Plan" he would have reseeded the same seed the next year and should that next year happen to be a bad rust year, then unquestionably, the farmer would stand to lose many hundreds of dollars.

The "Crop Testing Plan" has saved untold numbers of farmers from similar money losses during the past ten years; for it has been found that 18 percent of the samples submitted for testing proved on analysis to be entirely different varieties than the farmers thought they were producing.

I strongly recommend farmers who can do so, to attend one of the many "Crop Testing Plan" field days now being held throughout the West, and see this work with their own eyes.

Following factors have tended to raise price: No improvement is reported in new crop prospects in Australia and rain is still needed. It has been estimated that 1940 European wheat crops will be 340 million bushels less than in 1939 -- The acreage planted to soybeans in Manchuria is 15 to 30 per cent below last year.

Following factors have tended to lower price: Harvesting in Russia is proceeding actively under favorable conditions -- Corn crop prospects in Italy have been improving -- Beneficial rains have been received in the U.S. spring wheat belt -- The United Kingdom has made an agreement to take 78,400,000 pounds of Canadian cheese.

**Around Alberta . . .**

**Wheat Experiments**

Experiments of crossing hard and soft wheats were witnessed by a large group of elevator agents during a recent field day at the University. In explanation it was stated that the object of the experiment was to secure wheat as early as the hard variety and with the baking quality of the soft wheat. If the experiment is successful, it might result in a new crop for the Northern sections.

**Stage Coach:**

Shades of the Early West and Dearborn, Michigan, will be disturbed by a request from an official at Jasper Park for an oldtime 3-seated democrat or stagecoach. If and when found, the vehicle will be put into service carrying passengers between Medicine and Maligne Lakes.

**Bank of Alberta:**

Objects of the proposed Alberta bank were outlined by Hon. Solon E. Low before the standing committee of the House of Commons on banking and commerce. Such an institution would make loans to struggling industries, finance feeder associations and generally operate to build up the industrial life of the province, said Alberta's treasurer. Loans, when made, would be negotiated as carefully as those negotiated by existing banks. Mr. Low explained. He said that the chartered banks required the provincial government to guarantee loans to Alberta industry, and so if the province had to take the risk, it might as well "make for the people the profit now made by the chartered banks."

**Fish to Fry:**

More than 90,000,000 fish, fingerling, fry and eggs, have been placed in Alberta lakes and streams since the beginning of 1939, it was announced by Hon. D. B. Mullen, minister of Agriculture, under whose department the fish and game branch carried out the task. "At Lesser Slave Lake the department operates one of the largest fish hatcheries on the continent," said Mr. Mullen. An aerated tank truck is used in transporting the fish. Most modern obtainable, it has travelled 12,000 miles since its purchase in 1939.

**Bull Exhibit**

Visitors to the Edmonton Exhibition last week were given the opportunity of inspecting the fine young purebred bulls which the Provincial Department of Agriculture exchanges for scrub animals. Facilities were provided to give full information to visitors, all of whom commented favorably on the splendid animals. "The bull exchange policy has been one of the most popular livestock improvement policies ever to be set up in Alberta," said Mr. D. B. Mullen, Minister of the Department. "About 600 purebred bulls have been handled since it began."

**Grasshopper Blitzkrieg Fails to Materialize**

Feared invasion of grasshoppers beyond the southeast corner of Alberta has not materialized, according to O. S. Longman, provincial field crops commissioner. The expected threat was halted by favorable weather. In an effort to combat the pests the department of agriculture sent out 200 carloads of poison-bait to the infested area.

**TENDERS WANTED**

Tenders will be received on or before August 1st, 1940, for the erection of a fire chute and a small cement vault at the Didsbury General Hospital. Particulars can be obtained at the secretary's office.

**Canada to Supply Army with Universal Carriers**

UNIVERSAL machine gun carriers will soon be added to the list of army vehicles made in Canada for the fighting forces at home and overseas. These are equipped with caterpillar treads and are very manoeuvrable and speedy. They are armoured against small arms fire and will carry three Bren guns, or can be used to carry ammunition, wireless sets and other necessary equipment. They will be produced in the Windsor plant of Ford Motor Company of Canada, Limited, which has been selected as the most suitable for the production of this vehicle. In the lower photograph, Mr. Wallace R. Campbell, president of the Canadian Ford organization, is shown with Lieut.-Col. D. C. Warneke, officer commanding the Essex Tank Battalion, Windsor, inspecting one of the Universal carriers. Other army vehicles now made in the Ford plant in

Windsor include the powerful four-wheel drive gun tractor pictured above. These and other types of military vehicles are rolling off the assembly line of the Canadian Ford plant which is supplying nearly 10,000 units to the Canadian army and another 25,000 units for military purposes to other Empire governments. The plant is now being expanded by a \$700,000 addition to provide facilities for building Universal carriers and to increase production of other types of military vehicles.

**Melvin Notes.**

Mr and Mrs. E. Landeen and daughter Ethel returned home last weekend from their three weeks' vacation in Eastern Saskatchewan. Mrs. Les Warr returned with them and is spending a few weeks at the Landeen home.

Weekend baseball saw Melvin and Harmattan swat the air on the latter's stadium in a ding-dong tight scoring game, both sides adopting a more or less defensive policy. Melvin finally broke through the Harmattan blockade to emerge victors in a 1 to nothing verdict.

The Garfield Girls' Softball Team (comprising a number of West Didsbury players), motored to High River for a weekend engagement with the girls of that southern metropolis. The visitors showed their mettle and in a splendid exhibition of team work were worthy winners by 10-4. Garfield line-up: June Jacobson (captain), Mrs. B. Bellamy and the Misses Esther and Martha Goetjen, Marie and Alice Olsen, Marion Leavgood, Ella Bartz, Bertha Good and Beatrice Landeen.

**Burnside Notes**

There will be a dance in the Lone Pine Hall on Friday, August 2nd. Hugh Grieve and his 5 Star Orchestra will furnish the music.

Mr. and Mrs. Walter McCulloch have returned home from their trip to Sweet Grass, Montana.

The Red Cross dance to be put on by the Lone Pine W.I. will be held on Friday, August 16th, not on the 26th as published in error last week.

Pte. Chas. Mardon Sr., of the R.C.C.S., Calgary, spent his weekend leave at his home here.

Pte. Wallace Hughes, of the R.C. Dental Corps, Calgary, was the weekend guest of Robert Eckel and other Burnside friends.

**Agricultural Crop Report No. 5**

Crop conditions are good in Alberta at the present time (week ending July 8th). Rains since July 1st alleviated drought conditions that were becoming serious in many parts. All correspondents report that the outlook is optimistic for the present, but lack of adequate reserve of moisture in the south and east make more rain necessary to properly fill the crop.

Early wheat is heading throughout the province and coarse grains, although later, are making satisfactory progress. Recent rains benefited pastures. Haying is well on its way and yields are reported as very satisfactory.

Damage has not been extensive although grasshoppers caused serious losses in certain areas in the extreme south-east of the Province. Local hail storms destroyed some crop in several districts.

Livestock are in good condition. Dairy production is about normal while poultry raising is enjoying normal progress.

Conditions of all crops improved greatly after a period of dry weather that had caused some deterioration. Timely rains have advanced growth of wheat, which is now heading in the south and is in the shot-blade everywhere. Some southern areas report wheat heading 10 to 12 inches in height, with crop prospects not any too good.

Coarse grains are late, but on the whole are doing well. In central and northern districts their progress has been satisfactory.

Forage crops continue to advance, with hay yields reported as good. Exceptional hay crops are being taken off in some districts.

In the extreme south-eastern districts grasshopper damage has been severe, amounting from 10 to 15 per cent.

Hail storms have caused heavy damage in restricted areas. No large area, however, has been affected.

Read The Classifieds?

**Proposals to Meet New Crop Problems**

Proposals made to the Dominion Government by Line Elevator Companies to meet the problem of storage and financing of the 1940 wheat crop were made public Friday by G. W. P. Heffelfinger, president of the North-West Line Elevators Association.

In a communication to the Minister of Trade and Commerce, the Line Elevators point out that they are gravely concerned as to what measures may be adopted to take care of the situation that may develop this season through inability of farmers to deliver their grain due to congestion that will in all probability arise shortly after the commencement of the movement of the crop.

In regard to storage the Association sets forth that the farmer who cannot get his grain into a marketable position will be faced with continuing charges on his financial obligations and it is therefore urged that in the formulation of such a policy and procedure due regard be accorded to that important fact be recorded in an increased price based on the time of delivery.

Concerning financing the crop the Association points out that in the past, the elevator trade through arrangements with the Banks have financed the movement from farms through their elevators and they are in a position to continue to do so, but the position of the farmer who is unable to get his grain into an elevator so he can dispose of it or secure an advance, commands immediate attention and the formulation of a policy by the government before the crop commences to move.

The Association proposes to the government that any farmer who has his grain properly binned on the farm would have the right to apply to the Municipal Officer for an advance at minimum interest rate. The Municipal Officer would carefully examine the bin, satisfy himself the grain was in sound keeping condition, determine approximate bushels and issue a cash voucher to the farmer of a stated amount per bushel.

The banking facilities of the elevator companies could be used for the cashing of the vouchers and these advances would in turn be honored on presentation by the Wheat Board.

The voucher form would be so worded as to constitute a contract between the farmer and the Government, obligating the farmer to deliver the wheat at a designated station either previous to or upon instructions from the Municipal Officer the loan being a first charge on the grain.

Just to remind you—that NOW is the time to take your Binder Canvas to T. E. Scott for necessary repairs!

### MATRON'S WELL-CUT "UNDIES"

By Anne Adams

### WORLD HAPPENINGS BRIEFLY TOLD

The United Kingdom will foot the heavy bill for the maintenance of prisoners of war in Canada, authorities announced at Ottawa.

Princess Juliana of the Netherlands, now at Ottawa, has consented to act as patron of the Netherlands relief fund, it is announced.

Canadian troops stationed at Hamilton, Bermuda, have formed a "Maple Leaf Club" and have been given use of a large private home as a recreational centre.

The German consulate notified German youths of the class of 1921, or 19 years of age, resident in Shanghai, to report for registration for possible military service.

Kingston Powell, 84, believed to have been the first white man to file on a homestead in either Saskatchewan or Alberta, died at his farm home north of Edmonton.

President Roosevelt signed legislation requiring the 3,500,000 aliens in the U.S. to register and leave a record of their fingerprints with the nearest postmaster within the next four months.

It is announced that owing to existing conditions, the 1941 census of the British island colony, Port-of-Spain will not be taken. Estimated population of Trinidad and Tobago is 464,900.

Issuing a call with "the enemy at the gate," the Archbishops of Canterbury and York urged all Britons "who believe in God," to make "a momentary act of remembrance and prayer" every day at noon.

### HOME SERVICE

#### BLOSSOM OUT AT DANCES BY DOING SMART STEPS

#### Learn Variations at Home

Gaily dancing a smart fox-trot variation—is this the pair who used to drag out the same moth-eaten steps at every dance?

The very pair! But practicing new steps at home with diagrams and directions has transformed them into versatile dancers—whom everyone admires.

Try for yourself the popular Side-Close Left, the fox-trot variation we've diagrammed.

Count 1 Step forward on left foot. 2 Step forward on right. 3 Place left to side of right. 4 Close with right.

And envious glances follow you round the floor when you can give each dance its special style.

In the fox-trot and slow fox-trot you use a minimum of knee action. For a glamorous waltz, take an extra long step on the accented beat of the music. In the rumba and conga you sway hips, use heels. For the tango take precise catlike steps.

It's easy to excel at all the popular dances with our 32-page booklet. Gives diagrams and directions for the tango, rumba, conga, fox-trot, Westchester, samba, waltz and shag, also the Castle Walk, Waltz and Maxixe. Includes basic steps, variations.

Send 15c in coins for your copy of "How to Do the Newest Dance Steps and Variations" to Home Service Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg, Man.

The following booklets are also available at 15c each:

186—"Songs From Way Down South".

118—"Good Table Manners".

151—"Fun With Fortune Telling".

156—"Teach Yourself to Speak French".

175—"Best Exercises for Health and Beauty".

174—"How to Be a Good Swimmer".

### The Soy Bean

#### Has Many Industrial Uses Apart From Its Food Value

The soya bean is a native of China, but to-day its main home is the United States. This year's production of this bean in the U.S.A. is expected to amount to 110,000,000 bushels.

Fifty centuries ago the Chinese ate the soya bean, but nowadays the vegetable, while still used as food for man and beast, has hundreds of industrial uses, being used in the making of glycerin, varnish, billiard balls, note paper, ink, paints, automobile parts.

This continent first saw soya beans in 1804, when a New England clipper ship brought specimens to New England from China. It was not until much later that farmers learned that soya beans made excellent forage, and could be used, like alfalfa, to enrich exhausted soil. From 2,000 acres in 1909 the U.S.A. planting of soya beans has increased to 6,000,000 acres.

### Payoff In The Future

#### Louisiana Men Made Bet Neither Of Them Will Collect

Two friends made a bet in Baton Rouge, La., that will pay the winner over two billion dollars, but it won't do either of them any good. Payoff will be in 2432.

R. E. Collins bet J. D. Stottler \$2,500 that Louisiana's \$5,000,000 capitol building will not stand up 500 years. They banked the money in 1932 at four per cent interest and signed a contract that specifies the bank is to pay the money to the heirs of the winner—\$2,084,495,605.

12—"World Almanac".

### Getting It Straight

#### Wording Of Army Forms Seems To Cause Some Confusion

"Who is it does the wording of Army forms?" John Hilton asked the other day. "Who is it sticks all these long words in, when simple words would do? I'm looking at Army Form O.1700. It's the first form the budding soldier fills up, and before he signs it he must be sure he's read the bit at the bottom." What it says is: "For this purpose the expression 'pay' means the rate of pay to which the soldier is entitled and any proficiency pay or analogous emolument."

"Analogous emolument! It's moved an ex-soldier clerk of my acquaintance to humor. He is mixed up in it because he has to hand the forms out and explain them. He says he can see lots of parents scratching their heads over the news that Albert's got an 'analogous emolument' and wondering whether, if he should get home on leave, they ought to make a wire cage for it in the garden or borrow an extra large frying pan.

"But there's nothing to be done. Lurking somewhere in Whitehall are men with massive minds who use words like that just as you or I would say 'Pass the mustard', and naturally they put them on the forms; so we've all got to learn them or else make mistakes. Why, I've just been told of a mother in the Midlands who was mightily pleased because her boy, she said, has been promoted for checking the drill-sergeant. 'Promoted!' the neighbors said. 'Yes,' she said, 'they've made him a court martial!'" London Listener.

### Iceland Survey

#### Say German Airmen Established Landing Field Last Year

German airmen, in the guise of glider instructors, carefully surveyed Iceland last year. Haraldur Arnason, director of Iceland's chamber of commerce, told Halifax reporters. He reached Halifax by train, en route to Reykjavik from New York. The "glider instructors" established an excellent landing field in their lengthy visit but it has been destroyed by British troops who, with Canadian forces, are guarding the country.

### I Read---And Write---For You

By JOHN C. KIRKWOOD

About 250 years ago Joseph Addison defined happiness in these words: True happiness is of a refined nature, and an enemy to pomp and noise. It arises in the first place from the enjoyment of one's self, and in the next from the friendship and conversation of a few select companions. It loves shade and solitude, and naturally haunts groves and fountains, fields and meadows. In short, it feels everything it wants within itself, and receives no additions from multitudes of witnesses and spectators.

On the contrary, false happiness loves to be in a crowd, and to draw the eyes of the world upon her. She does not receive any satisfaction from the applause which she gives herself, but from the admiration she raises in others. She flourishes in courts and palaces, theatres and assemblies, and has no existence but when she is looked upon.

\*\*\*\*\*

The world's total number of motor vehicles, according to a recent official report, is 45,422,411 automobiles.

This includes the two that are in Spitzbergen and the 68 in Bermuda.

The United States has 68.5% of the total number. Britain ranks second,

France third, Germany fourth, and Canada fifth.

\*\*\*\*\*

Here in brief is the story of a man's rise from lowliness and obscurity to eminence. George Lewis Bourne was born in London, England.

He came to Canada in his youth. He worked for the Hudson's Bay Company and the Canadian Pacific Railway. Then he went to the United States in 1893, and became a locomotive fireman, and then engineer. While with the Chicago Great Western Railroad Company he worked for a while under Walter P. Chrysler, then master mechanic.

Subsequently Bourne became an instructor on air brake cars for the International Correspondence Schools. In 1904 he was made president of a company making railway materials.

Later he became president of the Superheater Company, making equipment for utilities and industries. Last month he died, at the age of 66.

A bulletin of the National Geographic Society has this to say about

### It Happened In Belgium

#### The Experience Of A Canadian With A Customs Official

The surrender of Leopold of the Belgians to Hitler and the Nazis recalls an experience we had in Loire a few years after the war.

We were driving from Antwerp to Paris and planned to cross the frontier from Belgium to France at Loire. We had been visiting some war cemeteries in that area and arrived at the Belgium customs station at noon. The office was closed for an hour and a half, but the customs officer was there chatting. We asked him if he would mind spending five minutes necessary to filling out the papers, so that we could proceed. He said he wouldn't do it and added that we shouldn't be there anyway.

We mentioned that we had been in Loire before and that the Belgians had been pretty glad to have the Canadians there during the war.

The Belgian customs official replied: "It would have been better if the Canadians and British had stayed out of Belgium and we had let the Germans take the country." —W. L. Clark in Windsor Star.

### Serve In North

#### Toronto Dentist Will Spend Summer Vacation In The Arctic Circle

Dr. R. J. S. Tickle, Toronto dentist, will spend his summer vacation in the Arctic Circle working among Eskimo and Indian nomads in the Anglican Arctic Diocese. It was announced in Toronto. He will fly north from Edmonton in July.

Miss Mildred Rundle of St. Catharines and Miss Dorothy Chapman of Brampton, both nurses, will travel to Akivik on the same plane to serve in All Saints' Anglican hospital.

### Repeating Rumors

#### Shun-The-War-Blues Poster Is Given Prominence In London

This "shun-the-war-blues" poster hangs in a corridor of Greenwich Police court in London: "By listening to or repeating rumors of calamity you help the enemy. Follow the example of Queen Victoria, who, at the age of 80, in the black days of the Boer War, said 'there is no depression in this house, and we are not interested in the possibility of defeat—it does not exist.'"

#### MILK, THE PERFECT FOOD

The elements necessary to the growth, repair and health of the human body are proteins, minerals, carbohydrates and vitamins, writes Dr. E. W. McHenry, in an article on nutrition in the current issue of "Health", organ of the Health League of Canada.

Milk provides some variety or other of all of these requirements, Dr. McHenry states, pointing out that milk is exceptionally rich in calcium, and this is of the greatest importance to infants and children because it helps to form sound, strong bones and teeth.

Milk not only is a rich source of vitamin A, but supplies the best protein, one that is especially helpful to growth, the article continues. And, too, milk supplies two more excellent and essential foods, cheese and butter. Cheese contains calcium in the proportion of one quarter of a pound to a quart of milk.

Eggs are an indispensable item of diet, the article asserts. They furnish protein, fat and vitamins and also the iron which the body must have.

The mother who can supply her family with plenty of milk, cheese, butter and eggs need worry very little about the health of her brood," Dr. McHenry states. "She has already provided most of the essentials of nutritious diet, and her chief concern will be variety of preparation.

**Editorial Note:** Readers who would like a valuable set of articles on the Cause and Control of Cancer may obtain them—free of all charge—by writing to: The Health League of Canada, Dept. W.N.U., 111 Avenue Road, Toronto, Ont. Just say: "Please send me Dr. McCullough's articles on Cancer", and print your name and address plainly.

### To Be Expected

#### Hilter And Mussolini Would Never Consider Peace Conference

George Lansbury, who recently died in Old London at the age of 81, had done his best to avert the present war both by personal sacrifice and counsel. It was in 1937 that Lansbury, known to his friends as "Uncle George", went to Berlin to meet Hitler. He suggested to the Nazi leader that he should join a world peace conference. Hitler refused, and Lansbury told him he would live to repent that decision. He went to Rome and told Mussolini: "You cannot bring back the glories of ancient Rome. You cannot take care of a civilization built on domination, force or the shifting sands of greed, ambition and avarice."

### The Park Lane Mystery

By Edgar Wallace

Copyright, by Edgar Wallace.  
Serialized by Ledger Syndicate.

CHAPTER IX.—Continued

"Did she ever tell you anything about her past?"

"Oh, no," said Aileen quickly. "It was mostly about her mother, who died about four years ago."

"Did she ever tell you her Christian name—the mother's, I mean?"

"Louisa," answered the girl promptly. "You're awfully mysterious, Mr. James Carlton. What has this to do with poor Mrs. Gibbons?"

"Nothing except that her name was Annie Maud, and the letters containing the money which came to her quarterly were addressed to 'Louisa,' 14, Kennet Road, Birmingham, and re-addressed by the postal authorities. A letter came this morning."

"Poor soul!" said the girl softly.

"Yes."

It was surprising how well she understood him, remembering the shortness of their acquaintance. She knew, for example, when he was thinking of something else—his voice rose half a tone.

"Isn't that queer? Do you remember my telling you of the 18,000 policemen and the brigade of guards, and the whole congregation of the blessed? And now they are all agitated because Mrs. Gibbin's mother was named Louisa! That discovery—I shouldn't have asked you, because I knew it already—proved two things: first, that Mrs. Gibbins committed a crime some fifteen years ago, and secondly, that this is the second time she's been dead!"

He suddenly relaxed, and laughed softly.

"Don't tell me," he warned her. "I know just the magazine character whom I am imitating! The whole thing is rather complicated. Did I say coffee or dinner?"

"You said coffee," she said.

The popular restaurant into which they went was just a little over-crowded, and after being served they lost no time in making their escape.

They were passing along Coventry Street when a big coupe rolled slowly past. The man who was driving was in evening dress. \* \* \* they saw the sheen of his diamond studs, the red tip of his cigar.

### WOMEN WANTED

38 to 52 years old. Women who are restless, moody, NERVOUS—who fear hot flashes, dizzy spells—to take Lydia E. Pinkham's Vegetable Compound. Pinkham's is famous for helping women during these "trying times" due to functional irregularities. Get a bottle today from your druggist! WORTH TRYING!

"Nobody on earth but the Splendid Harlow could so scintillate," said Jim. "What does he do in this part of the world at such an hour?"

The car turned to the right through Leicester Square and passed down Orange street at a pace which was strangely majestic. It was as though it formed part of and led a magnificent procession. The same thought occurred to both of them.

"He should really travel with a band!"

"I was thinking that, too," laughed the girl. "He frightened me terribly the night he came to the flat. I mean, when I opened the door to him. And I'm not easily scared. He looked so big and powerful and ruthless that my very soul cowered before him!"

They passed up deserted Long Acre; it was too early for the market carts to have assembled, and the street was a wilderness. Suddenly the girl found her hand held loosely in Jim Carlton's. He was swinging it to and fro in the way that children have when they walk hand-in-hand. The severer side of Miss Aileen Rivers closed its eyes and pretended not to see.

"I've got a very friendly feeling for you," said Jim huskily. "I don't know why, but I just have. And if you talk about the philandering constabulary, I will never forgive you."

Three men had suddenly debouched from a side street; they were talking noisily and violently, and they were moving slowly toward them. Jim looked round: the only man in sight was walking in the opposite direction, having passed them a minute or so before.

"I think we'll cross the road," he said, and took her arm, and, quickening his step, almost led her to the opposite sidewalk.

The quarrelling three turned back, and Jim stopped.

"I want you to run back to the other end of Long Acre and fetch a policeman," he said in a low voice. "Will you do this for me? Run!"

Obediently she turned and fled, and as she did so one of the three came lurching toward him.

"What's the idea?" he said loudly. "Can't we have an argument without you butting in?"

"Stay where you are, Donovan," said Jim. "I know you and I know just what you're after."

"Get him," said somebody angrily, and Jim Carlton whipped the 12-inch length of jambok that he carried in his pocket and struck at the nearest man. As the flexible blade reached its billet the man dropped like one shot. In another second his two companions had sprung at the detective and he knew that he was fighting, if not for his life, at any rate to save himself from an injury which would incapacitate him for months.

Again the jambok reached home; a second man reeled. And then a taxicab came flying down Long Acre with a policeman on each foot-board. \* \* \*

"No, not Bow Street," said Jim: "take them to Cannon Row."

Aileen was in the taxicab, a most unheroic woman, on the verge of tears.

"I guessed what they were after," said Jim, as they were driving home. "It is one of the oldest tricks in the world, that rehearsed street fight."

"But why? Why did they do it? Were they old enemies of yours?" she asked, bewildered.

"One," he said. "Donovan." He carefully avoided her first question.

The presence of Mr. Harlow in his lordly coupe was no accident. The car which had passed down Orange street was ostensibly carrying him to Vira's Club, but there was a short cut which had brought him through St. Martin's Lane to the end of Long Acre before the two walkers could possibly reach there. What was more important was that it was very clear to Jim that he and the girl were under observation and had been followed that night from the moment he left the club where he lived, until the attack was delivered.

The reason for the hold-up was not difficult to understand even supposing he ruled out the very remote possibility that it was associated with Mrs. Gibbins' death. And that he must exclude, unless he gave Mr. Harlow credit for supernatural powers.

He saw the girl to her lodgings and went back to Scotland Yard to find a telegram awaiting him. It was from the detective force of Mount Baker—which is in Birmingham, and ran:

### Food Shortage In Europe

Herbert Hoover Predicts Most Disastrous Famine In Europe

Herbert Hoover merged his war relief experience of 20 years ago and his observations on present conditions abroad into a prediction that the sceptre of "the most disastrous famine in history" hangs over Europe.

If the present war is a short one, he said, there will be a "short famine," but if it continues for many months the problem of feeding Europe's millions will be unparalleled in the history of human suffering.

The Belgian city of Brussels, Hoover added, probably will be without food in 30 to 60 days unless aid is provided.

He said he had communicated with Germany, Great Britain and the "refugee government" of Belgium seeking consent for some "third party intervention" to feed the starving. Private charity could not handle the situation, he declared, recalling it took \$25,000,000 a month to feed Belgium in the last war.

### Common House Fly

A Well Proven Fact Is That Flies And Good Health Cannot Exist Together

The diseases and maladies that can be attributed to the common house fly can hardly be overstated. It has been proven through laboratory tests that more than 30 different disease organisms are carried by these pests. Also, that the bacteria on the hairy body of a single fly is sufficient to infect an entire household. Yet, in spite of warnings by medical authorities, many people far too often accept the fly's existence and tolerate its presence as an inevitable nuisance during sunny days and warm weather.

Every year, unfortunately, we pay dearly for this indifference with outbreaks of infectious diseases for the simple reason that these germ carriers, born and matured in fifth eventually transmit this fifth to drinks and food left uncovered. Summer dysentery and other infant maladies can often be traced to ordinary house flies.

While several methods have been devised to control this deadly menace to our national health, it is practically impossible to completely eliminate it. As individuals, however, we can accomplish a good deal towards stamping out the danger in our homes by getting rid of any flies that happen to get in.

A very effective, convenient and inexpensive method is to trap the flies with Wilson's Fly Pads. Three or four of these, placed in strategic points throughout the house, will work quickly, cleanly and kill all the flies. This protection should start with the first sign of the fly season and continue throughout the summer months.

If every home and eating place adopted this precautionary measure much would be accomplished in banishing the menace to our health and thus make our community a safer, cleaner place to live in.

### SELECTED RECIPES

#### MAPLE FUDGE

1 lb maple sugar, broken small  
2 1/2 cup Bee Hive Golden or White Corn Syrup  
1/2 cup milk  
1 tablespoon butter  
1/2 cup chopped nuts  
Few grains salt

Mix all but nuts together and beat slowly until dissolved. Boil without stirring until firm ball in cold water. Let stand until just warm then beat until thick and creamy. Pour immediately in buttered pan. Add nuts while beating.

#### HAWAIIAN PATTIES

2 cups ground, uncooked veal  
6 Christie's Soda Wafers, (crumbled fine)  
1 egg  
1/2 teaspoon salt  
1 teaspoon minced onion  
6 slices pineapple  
3 tablespoons butter

1/4 cup brown sugar  
1/2 cup pineapple juice  
1/8 teaspoon ground cloves

Mix first five ingredients and shape into six flat patties. Brown pineapple in two tablespoons butter, then brown veal patties. Place veal patty on each pineapple slice in a greased baking dish. Put remaining butter and sugar into the frying pan and melt over low flame. Add pineapple juice and cloves, heat and pour over patties. Bake covered 20 minutes in a hot oven (425 degrees F.) Six portions.

#### Cost Of Poetry

An English publishing company, Heath Cranton, Limited, has put out a 29-page pamphlet of poems and sonnets about Canada entitled "From the Canadian Prairies". The price is two shillings sixpence in England and 90 cents in Ottawa. Ninety cents for 29 short verses seems quite a price, but perhaps the drawing power is the fine picture on the front cover of Mount Baker—which is in the United States—Ottawa Journal

### ITCH STOPPED IN A JIFFY

stainless. Soothes irritation and quickly stops intense  
itching. Best reliable product, or money back. Ask  
your druggist today for D.D.D. PRESCRIPTION.

### A Common Cause

Christian Science Monitor Comments On U.S. Price Tax On Armaments

A news item records that \$37,000,000 worth of surplus war material, munitions, and ordnance has been sold by the United States War Department to a steel company which in turn is delivering it at that price to the British and French Allies.

This is heartening and gratifying in the sense that it indicates that American aid through the furnishing of supplies to the Allies is actually getting under way. The more quickly other such deliveries of guns, airplanes and other equipment can be made, the better.

Yet since Americans clearly believe their own interests and safety depend on the success of British and French resistance to aggression, why do they haggle over payment and put a price on the assistance they are willing to give? Why charge the soldiers of Britain and France for means of protecting a freedom and decency that is America's as well as theirs?

If the United States by an expenditure even of billions of dollars can help establish a world order based on justice instead of force, and can be spared the sacrifice of its sons, the victory will be cheaply purchased. In a common cause, should not America from now on be glad to give arms to the Allies in addition to those they can purchase?—Christian Science Monitor.

### The Only Viewpoint

Canada Should Adopt Britain's Hopeful Outlook For The Future

The Huron Expositor, Seaforth, Ont., says:

The disaster to the Allies in France is too crippling to make light of, and as we are able to comprehend it, with the passing of the days, it will become more realistic and terrifying.

But it can be viewed in different lights. And here is one of them. Speaking in England, the British Parliamentary Secretary of the Minister of Information said:

"It will not be on the dry land of Europe that this war will be won. It will be upon the seas and in the air; in distant continents; as soon as unlimited resources of the British Empire and the Americans can be mobilized to turn the scale."

If that is true, and a member of the British Government would scarcely say it, if it were not, all is not yet utter darkness on the side of Britain. There is still hope, at least as Britain views the scene. And if there is still hope for Britain and Britain still believes in hope, why should we, in Canada, become too downcast?

### GEMS OF THOUGHT

#### PRAYER

A prayer in its simplest definition is merely a wish turned Godward.—Phillips Brooks.

Practice in life whatever you pray for, and God will give it to you more abundantly.—Pusey.

Prayer is the utilization of the love wherewith He loves us—Mary Baker Eddy.

He prayeth best who loveth best.—Coleridge.

In prayer it is better to have a heart without words, than words without a heart.—Bunyan.

The simple heart that freely asks in love, obtains.—Whittier.

The Brandon Sun says when the war situation looks too bad, quit looking.

#### For Better Service

While Europe was at peace first class hotels, bars and restaurants in Italy ruled that employees dealing with the public must speak at least two of the three languages, English, French and German, in addition to their native tongue.

Mussolini has put himself in the Judas class for all time.

### Mountain View Notes

The July meeting of Mountain View W.I. was held at the Hall on Thursday, July 18, when the grandmothers of the district were entertained. Each grandmother received a bouquet of garden flowers. An enjoyable children's program was given and a Quizz was conducted. An auction of household articles was held.

The August meeting will be held at the home of Mrs. Ernest St. Clair on August 15th. Mrs. Ed Barnes will speak on "Child Welfare."

### Ontario Wheat Set at 70 Cents

The first announcement of wheat prices for the new crop came Saturday from the Government when Trade Minister J. A. MacKinnon stated an initial payment of 70 cents a bushel would be paid for No. 1 grade Ontario winter wheat, basis Montreal export freight rates, the same as was allowed for last year's crop.

The initial price guaranteed by the government for last year's winter wheat of top grade was the same as set for No. 1 Northern spring wheat, basis, head of the lakes.

An authoritative source said: "You can draw your own conclusion," when asked if the government's action in continuing the winter wheat prices at the same rates as last year indicated that spring wheat would also be left at the same level.

It was intimated that the guarantee price for spring wheat would not be announced for a day or two. Meanwhile the minister was meeting with the members of the wheat board and departmental wheat experts.

### Red Cross Notes

Alberta Red Cross volunteer workers are maintaining their vigorous stride in war work. Since February 1st their contributions to date of July 18th have enabled Divisional Headquarters to ship 1,396 cases of surgical, soldier and refugee supplies Overseas.

Included in this grand total were 77 cartons containing 2,614 blankets, 173 cases containing 183,806 surgical dressings, 516 cases containing 153,705 articles of soldier supplies, and 28 cases carrying 9,720 articles for refugee relief.
